Onan Lp Generator Troubleshooting Guide

Before any evaluation of the controls, regulator or generator can proceed, the Onan engine must have oil and fuel, be in running condition and the 12-volt battery charged. The electronic governor, 151-0752, on Models BGM and NHM, Spec B and later, must be functioning properly. This guide does not cover engine maintenance and repair procedures

RV GENERATOR TROUBLESHOOTING GUIDE

The LP generator has a regulator to meter the high-pressure gas from the propane storage tank at a much lower pressure to the intake manifold of the generator's internal-combustion engine. During operation, a flexible diaphragm within the regulator moves back and forth in response to engine demand.
